Introduction

TECHLOG (Technological Transfer for Logistics Innovation in Mediterranean area) is a project financed by the European Union within the call for strategic projects of the European cooperation programme ENI CBC MED “Mediterranean Sea Basin Programme” 2014-2020. The ENI CBC MED Programme is the main cross-border cooperation initiative implemented by the European Union under the European Neighbourhood Instrument (ENI).

The project is led by CIREM - Inter-University Centre for Economic Research and Mobility of the University of Cagliari and coordinated by Professors Gianfranco Fancello (Scientific Coordinator) and Patrizia Serra (Technical Coordinator); in addition to Unica, eight partners from the academic and business worlds of five Euro-Mediterranean countries are involved.

The 5 countries involved are Italy (IT), Egypt (EG), Spain (SP), Lebanon (LB) and Tunisia (TUN).

The 9 partners involved are:

- University of Cagliari Unica-CIREM (Lead Beneficiary);
- Chamber of Commerce Industry, Crafts and Agriculture Maremma and Tyrrhenian Sea (IT);
- Arab Academy for Science, Technology & Maritime Transport (EG);
- Escola Europea – Intermodal Transport (SP);
- The Confederation of European Egyptian Business Associations (EG);
- Chamber of Commerce, Industry and Agriculture of Beirut & Mount Lebanon (LB);
- Federation of Egyptian Chambers of Commerce - Alexandria Chamber (EG);
- Chambre de Commerce et d’Industrie de Sfax (TUN);
- Université de Sfax (TUN).

Using an open innovation approach, TECHLOG implements a permanent cross-border laboratory aimed at facilitating the development of joint technology transfer initiatives between the academic and business worlds in the field of advanced training for personnel in port and road transport communities. Concretely, TECHLOG will develop innovative

TECHLOG

training programmes in the field of logistics based on the use of advanced driving simulators for eco-driving, safe driving and improved operator performance. These programmes will be tested through several pilot actions directly involving the port and road transport communities of the five countries involved.

As a strategic project, TECHLOG also implements actions to strengthen the capacity of public institutions to manage innovation processes in the port and road transport sectors and implements a capacity building process aimed at elaborating a joint proposal for a shared standard for the Mediterranean area in the field of advanced and certified training for transport and port personnel that can strengthen their operational efficiency and competitiveness.

Thanks to TECHLOG, operators and institutions operating in the port and road transport sector will have a reference point to co-design and promote technology transfer initiatives based on the use of advanced driving simulators aimed at improving the performance, competitiveness and sustainability of the port and road transport sector in the Euro-Mediterranean area.

The main beneficiaries of the project include transport authorities, port authorities, terminal operators, research and training centres dealing with advanced simulation for transport and logistics, transport companies and port operators.

The project activities were divided into 6 Work Packages (WP):

- WP1: Management;
- WP2: Communication;
- WP3: Analysis of the state of art and practice in the field of KETs for (trans)port activities;
- WP4: Setting up of the Mediterranean Cross-Border open lab for technology transfer;
- WP5: Joint development of technology transfer initiatives;
- WP6: Pilot actions.

This document represents the main output of activity A3.2 of WP3.

Scope of the document

The objective of WP3 was twofold:

1. to identify existing innovation practices in the field of advanced training and simulation for transport and port requirements and analyze their potential implications on human, safety and environmental factors
2. to preliminarily assess the transferability of the identified practices to a selection of Euro-Med transporters and port operators who can benefit from such transfer to improve their performance in terms of productivity, safety and environmental sustainability.

To achieve these objectives, WP3 consisted of 3 main activities:

- A3.1 Analysis of the state of art and practice in the field of advanced training and simulation for transport and port workers and identification of the main organizations and research centres in the field
- A3.2 Identification of the Euro-Med transport and port operators who can benefit from the transfer of the practices identified
- A3.3 Assessment of the transferability of the practices identified to the actors selected on the basis of their needs.

This document represents the output of activity A3.2 and analyses the Med operators/organisations that can benefit from the transfer of the best practices preliminarily identified in WP3. The document includes a survey of the main Mediterranean port and transport operators operating in the five countries involved by the project. The publication summarises the result of the survey by describing for each port, transport operator or MSME analysed, the emerging needs for innovation in the areas of training for growth, training for safety, training for the environment.

The document is organized as follows. Chapter 1 describes Activity A3.2 in terms of objectives, surveyed subjects and survey methodology. Chapter 2 contains the description of the questionnaire used in the survey. Chapter 3 reports the results of Activity A3.2. All the related annexes and documents are attached at the end of this report.

It is emphasized that the analysis reported is not exhaustive of the state of art but is in any case representative of the port and transport sector in the EURO/MED area and functional

to the identification of the subjects to be involved in the subsequent development phases of the project.

TECHLOG

1. Description of activity A3.2

1.1 Objective

Activity A3.2 aimed to identify transport and port operators in the EURO/MED area who can benefit from advanced training and simulation to improve their performance in terms of productivity, safety and environmental impact.

Therefore, information on transport and port subjects/organizations in the EURO/MED area was collected through a survey in order to identify specific needs in the areas of innovation and to increase their efficiency in terms of productivity, safety and the environment.

The related survey has also been used as an opportunity to start getting in touch with the project target groups for their active involvement in the subsequent phases of the project.

1.2 Surveyed subjects

The subjects involved in the survey belong to the following categories:

- trucking companies (haulers)
- professional associations of haulers
- port workers companies
- professional associations of port workers
- container Terminal Operators
- port authorities.

1.3 Survey methodology

The survey activity was conducted by all partners from December 2021 to June 2022. To ensure homogeneity and consistency in data collection, the survey methodology to be followed was specified by Unica-CIREM (Coordinator of the activity) in a document, the so-called Inception Report (see Appendix 1), accompanied by an editable annex “Annex 4” (see Appendix 2) to be used to survey transport and port subjects/organizations/enterprises, which may be interested in technology transfer in the field of advanced training and simulation for ports and transport activities. In the first phase

TECHLOG

of investigation (January 2022), all the partners, each for the area of reference, prepared a preliminary list of subjects of potential interest for the investigation.

Although Annex 4 was developed in English and built using the editable PDF format, not all partners used this standard resorting from time to time to other languages and alternative formats, thus requiring extra effort for data processing during the analysis.

In March 2022, during the second steering committee meeting, it was decided to broaden the scope of the survey by including in the collection form an additional section “general needs” relating to the general needs in terms of innovation perceived by the companies, Annex 4 was therefore revised in this direction. The companies that had already completed the questionnaire were asked to respond to the new section.

When after verification by the lead partner ambiguous responses in the filled questionnaires were detected, the partners were requested to re-contact the stakeholders for a further check.

The collection process ended in June 2022. A total of 112 responses were received, but not all questionnaires are complete and useful for the survey. As for the new section “general needs”, there were 16 responses.

The following table shows the roles that each partner played within the activity, divided between the port and road transport sectors.

A3.2 – ROLE MATRIX	APPL Unica	PP1 CCIAA MATI	PP2 * AASTMT	PP3 EEIG	PP4 CEEBA	PP5 CCIA BML	PP6 * Alex Chamber	PP7 CCISfax	PP8 UniSfax
<i>Census and data collection of subjects/organizations related to the port sector</i>	Activity coordination	For Italian area	For Egyptian area*	For Spanish area		For Lebanese area	For Egyptian area*		For Tunisian area
<i>Census and data collection of subjects / organizations related to the road transport sector (road haulers)</i>	Activity coordination	For Italian area	For Egyptian area	For Spanish area		For Lebanese area		For Tunisian area	

***PP2 Arab Academy will need to coordinate with PP6 to carry out the survey, as they work on the same reference area**

TECHLOG

2. Description of the questionnaire

The questionnaire, designed by the Unica-CIREM (WP3 coordinator), was submitted to entities, organisations and companies operating in the logistics sector in order to detect any critical issues regarding growth, safety and the environment.

This questionnaire is divided into 4 sections.

2.1 Section 1: General information

This section preliminarily identifies the general characteristics of the respondent in terms of:

- details of the organization (name, address, website) and contact person
- reference sector (ports, road haulage or other) and type of subject (trucking company, professional association of haulers, professional association of port workers, etc.)
- company size (number of employees) and categories of workers.

TECHLOG

SECTION 1: GENERAL INFORMATION

Name of the organization:

Address (street, city, country):

Website:

Reference person:

Name and surname:

Email:

Telephone:

REFERENCE SECTOR: ☐ Ports ☐ Road haulage ☐ Other

TYPE OF SUBJECT (Multiple options are selectable):

- ☐ Trucking company (haulers) ☐ Professional association of haulers
☐ Professional association of port workers ☐ Port workers' company
☐ Container Terminal Operator ☐ Port authority
☐ Other

COMPANY SIZE (Number of employees):

PROFESSIONAL DRIVER / OPERATORS IN THE COMPANY / ORGANIZATION, please indicate the number for each relevant category:

- ☐ truck drivers ☐ quay cranes ☐ yard cranes ☐ port tractor drivers
☐ reach stacker operators ☐ straddle carrier drivers ☐ Other

2.2 Section 2: Training

This section includes questions related to the topic of training. The organisation/enterprise is first asked whether it provides training for its staff. If yes, it is asked to specify the characteristics of the courses, whether it is legally obliged to provide training for its employees, and if it also promotes non-compulsory training. Additional information concern:

- the type of workers to whom the training is addressed (truck drivers, quay cranes, yard cranes, ...)
- hours of training provided per employee
- training providers (external training providers or internal training staff)
- location of the training (company's premises or outside)
- objective of the training (improving safety at work, improving operators' performance, mandatory refreshing training, ...)
- (possible) use of driving simulators in training

TECHLOG

SECTION 2: TRAINING

DOES THE COMPANY PROVIDE TRAINING FOR ITS STAFF?

☐ Yes ☐ No

If yes, please indicate the characteristics of the courses:

Is this company legally obliged to provide training for its employees? *(If yes, please indicate the national or international legal reference)*

☐ Yes ☐ No

Do employees also do non-compulsory training? *(Only if you answered yes to the previous question)*

☐ Yes ☐ No

To which operators is the training addressed?

☐ truck drivers ☐ yard cranes
☐ quay cranes ☐ straddle carrier drivers
☐ port tractor drivers
☐ reach stacker operators ☐ other

How many hours of training are provided each year to each operator? Complete for the relevant figures

☐ truck drivers ☐ yard cranes
☐ quay cranes
☐ port tractor drivers ☐ straddle carrier drivers
☐ reach stacker operators ☐ other

Who provides training for the employees?

☐ External training providers ☐ Internal training staff

Does the training take place at the company's premises?

☐ Yes ☐ No

☐ Yes ☐ No
(Please detail type of course, type of simulator, number of hours of use, etc.)

Does employee training include hours to perform on a simulator?

The provided training is aimed at:

☐ Improving safety at work ☐ Improving operators' performance
☐ Mandatory refreshing training ☐ Other

2.3 Section 3: Areas for action and improvement role of partners

This section addresses the areas of improvement that may be of interest to the subject surveyed. Firstly, subjects are asked which among the proposed areas (safety improvements, environmental improvements, productivity improvements) they would like to improve more through advanced training.

The improvements relating to each of the three areas concern, respectively, system performance in terms of safety (e.g.: improving the human-machine interface, reducing fatigue, reducing the likelihood of accidents), environmental impact of transport activities (e.g.: eco-driving), and operator's performance in carrying out tasks.

It is then asked to indicate the company's main needs or criticalities and how these needs/criticalities could be tackled (advanced training for staff, upgrading of equipment, digitization processes, ...).

TECHLOG

SECTION 3: IMPROVEMENTS AND IMPLEMENTATION

IN YOUR BUSINESS, WHICH OF THE FOLLOWING AREAS YOU WOULD YOU LIKE TO IMPLEMENT AND IMPROVE THROUGH ADVANCED TRAINING? *Indicate for each heading the most suitable value ranging from 1 (extremely) to 5 (not at all):*

	1	2	3	4	5
SAFETY IMPROVEMENTS:					
Improving system performance in terms of safety (e.g., improving the human-machine interface, reducing fatigue, reducing the likelihood of accidents, etc.).	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
ENVIRONMENTAL IMPROVEMENTS:					
Reducing the environmental impact of transport activities (e.g., eco-driving)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
PRODUCTIVITY IMPROVEMENTS:					
Improving the operator's performance in carrying out tasks.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

* 1: EXTREMELY; 2: VERY; 3: MODERATELY; 4: SLIGHTLY; 5: NOT AT ALL

IN YOUR OPINION, WHAT ARE THE MAIN NEEDS AND OR THE MAIN CRITICALITIES IN YOUR COMPANY?

IN YOUR OPINION, HOW COULD THIS NEED AND OR THIS CRITICALITY BE TACKLED? *(Up to three options are selectable):*

- ☐ Advanced training for staff
 ☐ Upgrading of equipment
 ☐ Digitalization processes
- ☐ Regulatory simplification
 ☐ Marketing actions
 ☐ Labour market policies
- ☐ Other

TECHLOG

2.4 Section 4: Projects

In this section the company is asked whether it has ever been involved in other projects related to advanced training activities for port and transport personnel, with or without the use of simulators.

If yes, they are also asked to provide information regarding the most relevant projects (project name, funder, role in the project, ...).

SECTION 4: PROJECTS

Have this organization ever been involved in other projects related to advanced training activities with or without the use of driving simulators?

☐ Yes ☐ No

If YES, please provide information regarding the most relevant project(s):

PROJECT 1

PROJECT NAME	<input type="text"/>		
PROJECT FUNDED BY	<input type="text"/>		
ROLE IN THE PROJECT	<input type="checkbox"/> Lead beneficiary	<input type="checkbox"/> Partner	<input type="checkbox"/> Associate Partner
IMPLEMENTATION PERIOD	From <input type="text"/>	to <input type="text"/>	
WEBSITE	<input type="text"/>		

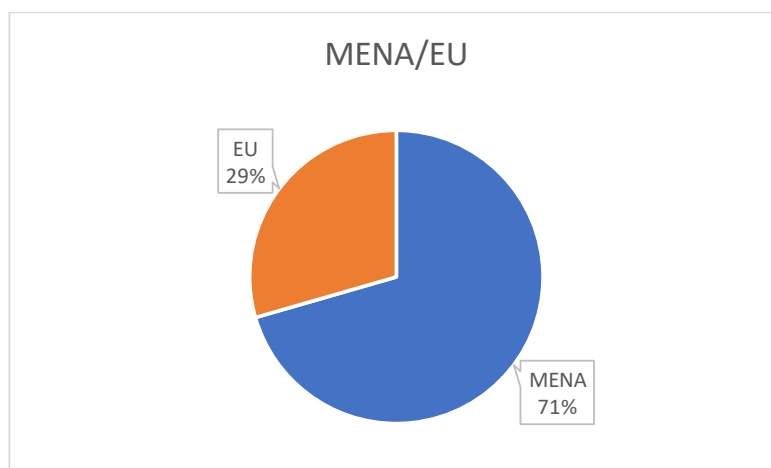

TECHLOG

3. Results of activity A3.2

3.1 Section 1: General information

The number of companies/organisations that responded to the questionnaire was 112.

Of the 112 questionnaires, 29.5% came from EU companies/organisations and 70.5% from MENA (Middle East and North Africa) ones.

The following graph shows the nationality of the 112 participating companies/organisations.

TECHLOG

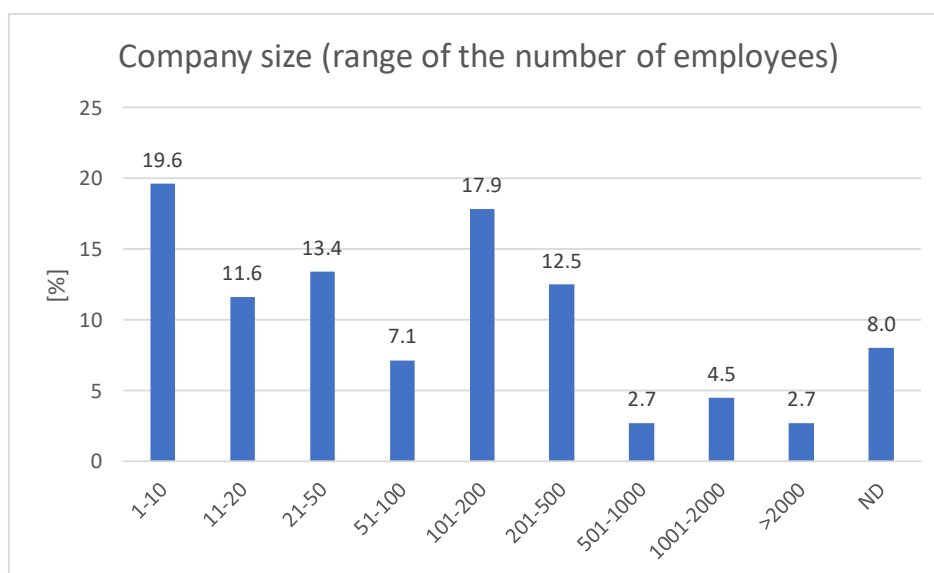

25.0% of the questionnaires came from Tunisia, 23.2% from Egypt, 22.3% from Italy, 22.3% from Lebanon, and 7.1% from Spain.

Below is a graph representing the size - in terms of number of employees - of the companies surveyed. The analysis was conducted considering nine size categories.

TECHLOG

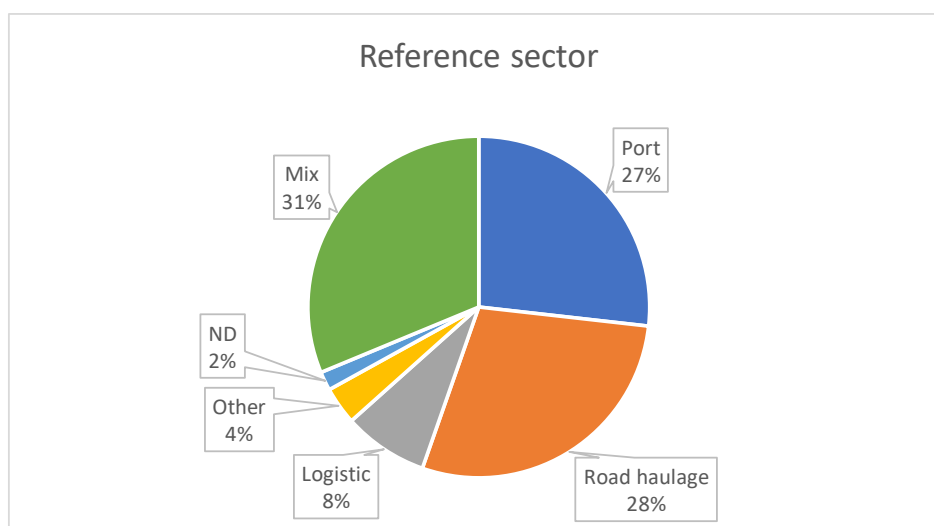

As can be seen, most of these companies (19.6%) belong to the category between 1-10 operators. A similar percentage (17.9%) was recorded for companies with between 101 and 200 operators. Companies with more than 2000 operators were only 2.7%.

The following graph, on the other hand, highlights the areas in which the companies operate:

- 31.3% state that they operate in several sectors (mix)
- 28.6% operate exclusively in the field of trucking
- 26.8% operate exclusively in the port sector
- 8.0% are involved in the logistics sector
- 3.6% do not fall into any of the previous sectors
- 1.8% do not answer.

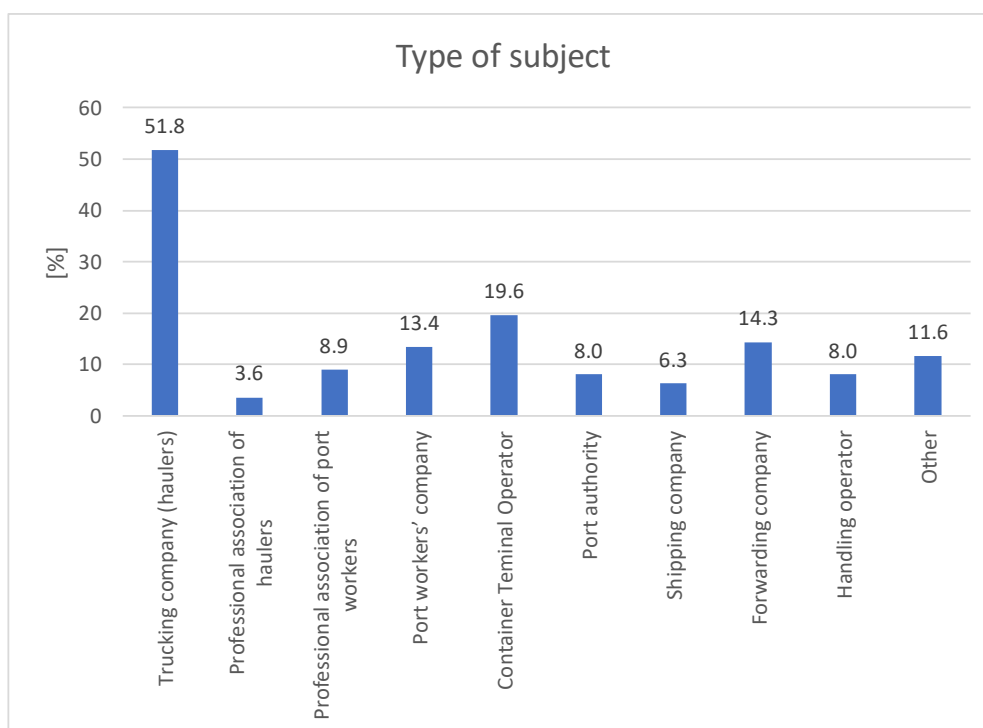

TECHLOG

Analysing the most relevant data with reference to the type of organisation, it can be stated that more than 50% of the organisations surveyed are road haulage companies, 19.6% are Container Terminal Operators, followed by forwarding companies with 14.3%, while the remaining categories are indicated by companies in percentages below 14.0%.

TECHLOG

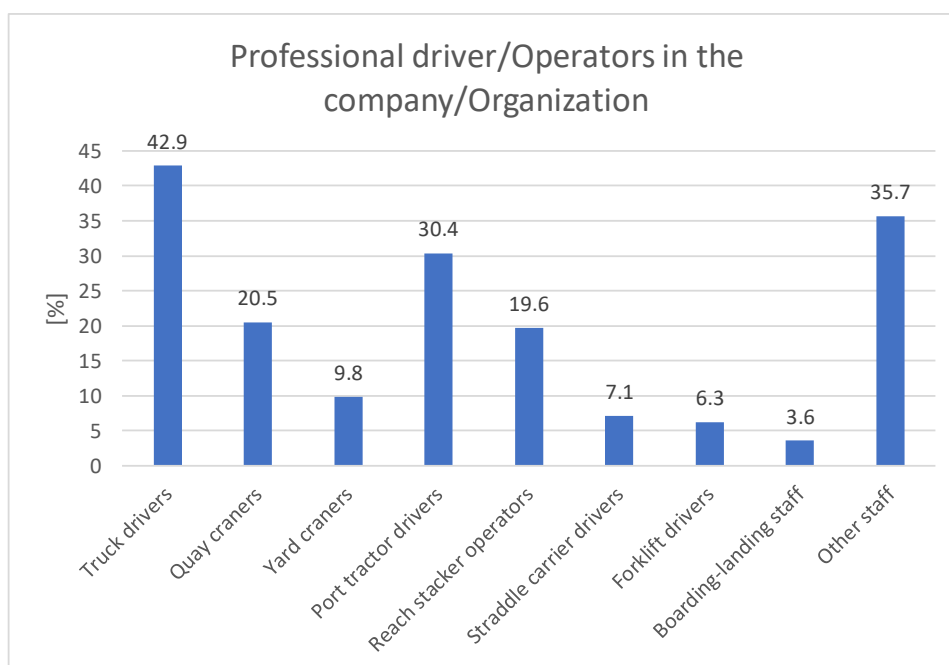

With regard to the categories of operators, it emerged that truck drivers are the figure that prevails over the others within the companies analysed. Among the other relevant categories, 30.4% of the companies include within their staff the figure of the port tractor driver and 19.6% that of the reach stacker operator. It should also be noted that 35.7% of the companies have professional figures that do not fall into the listed categories.

Below is the graph relating to the analysis of the types of operators described.

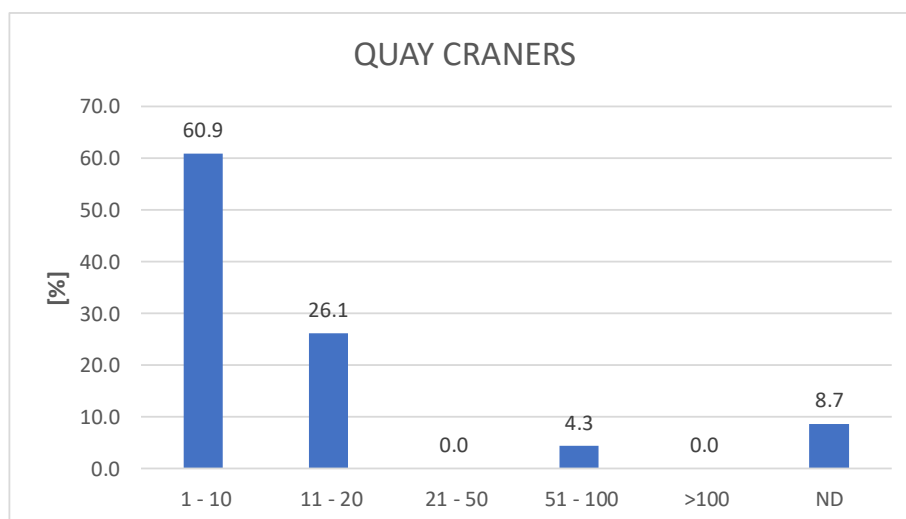

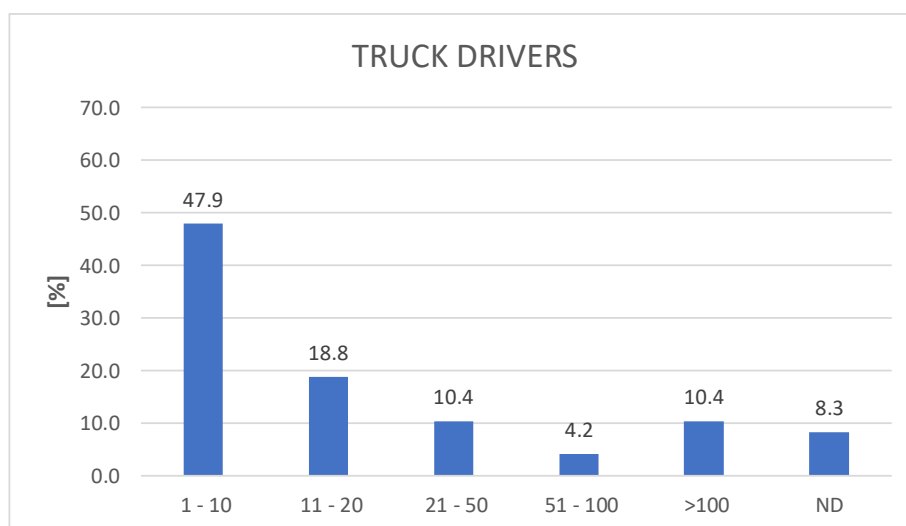

TECHLOG

Going into more detail, the following graphs show the number of employees in each of the identified categories, broken down into ranges.

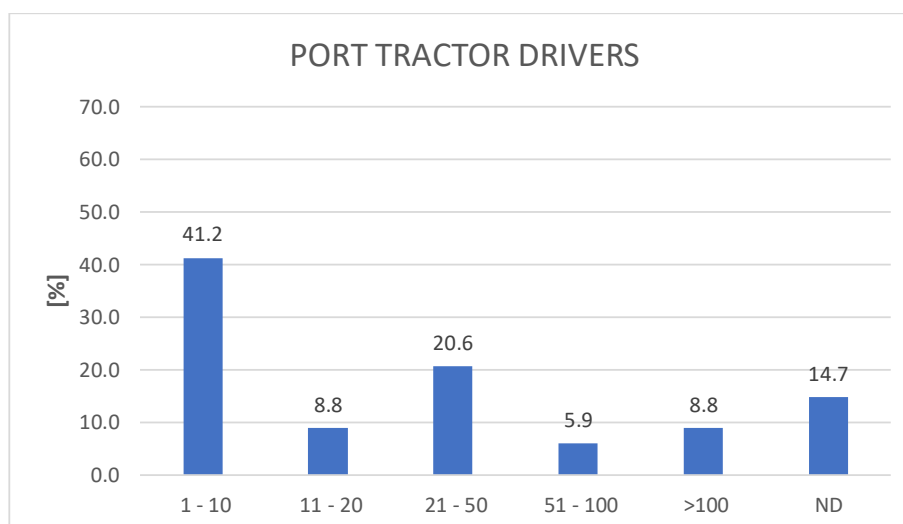

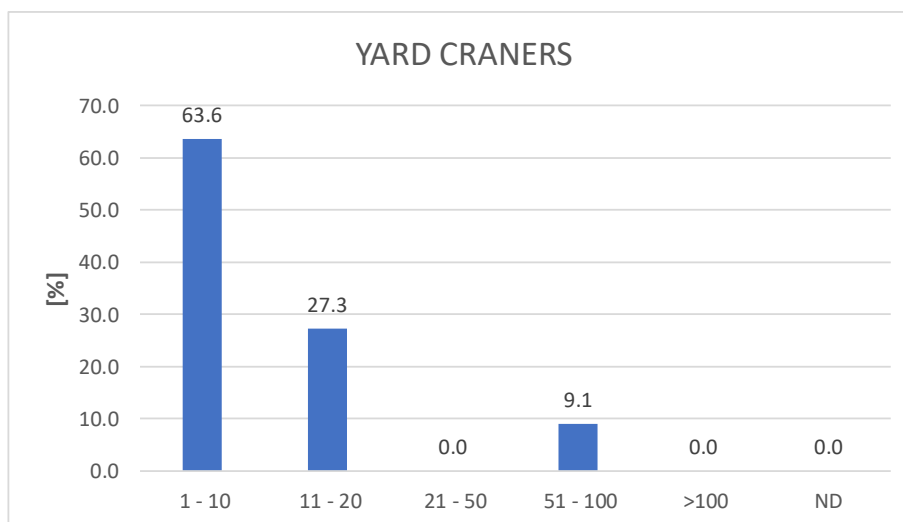

TECHLOG

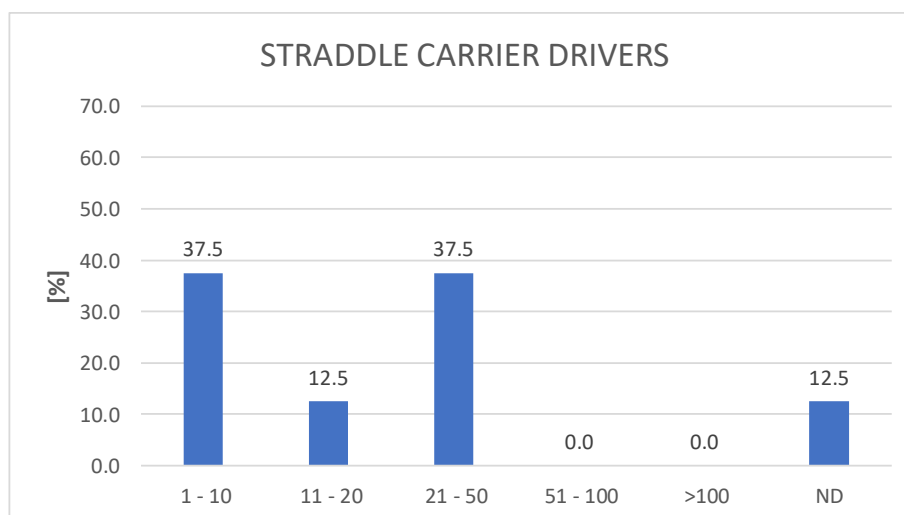

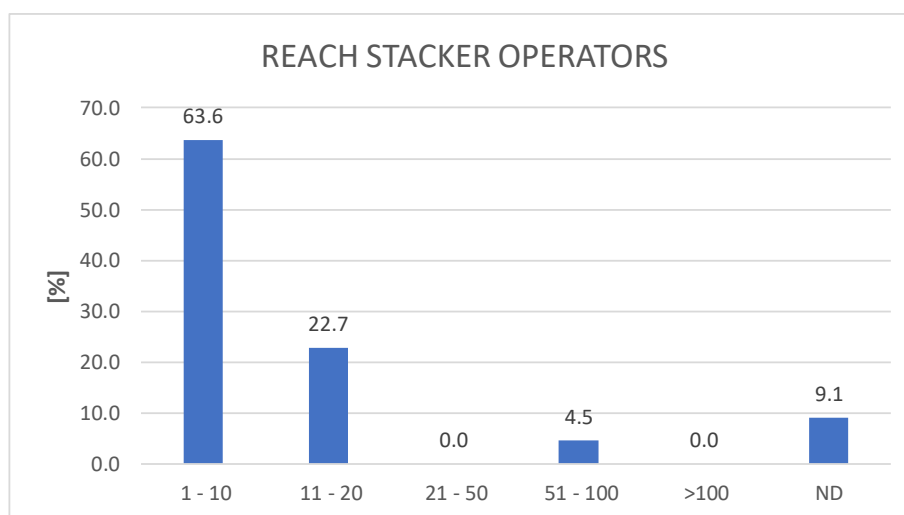

TECHLOG

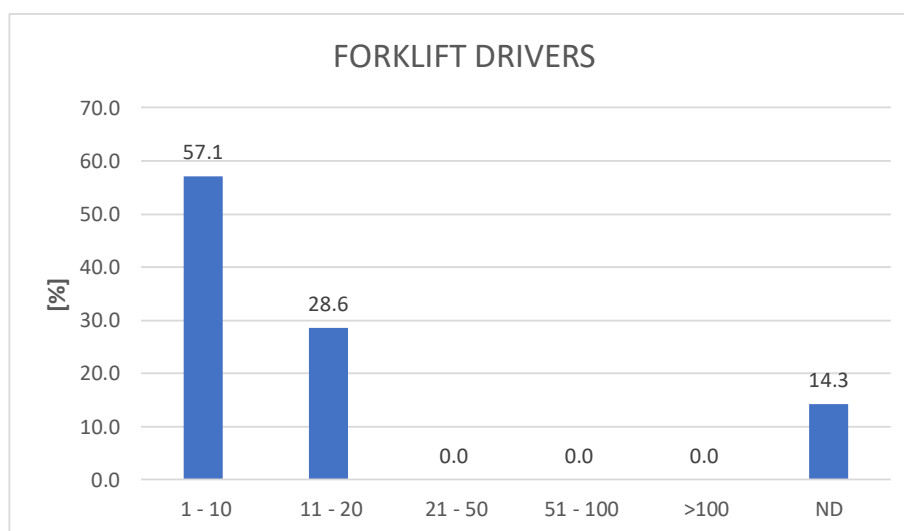

TECHLOG

TECHLOG

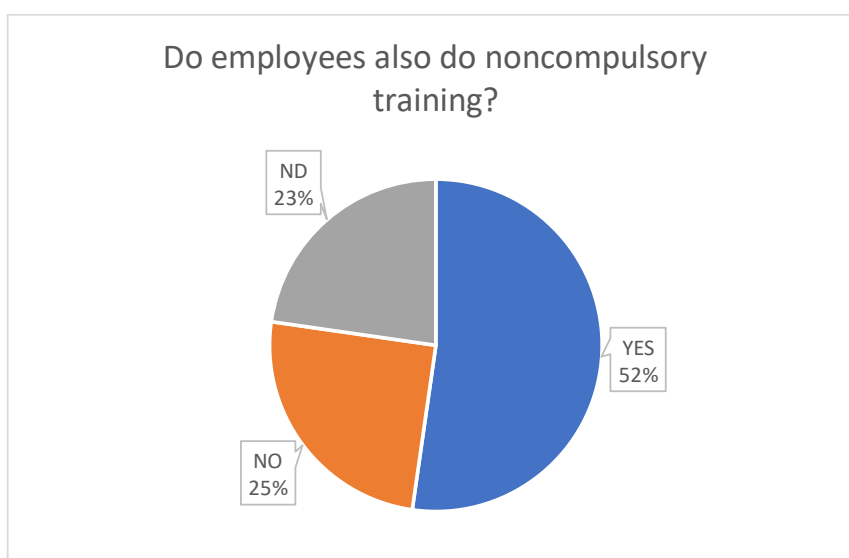

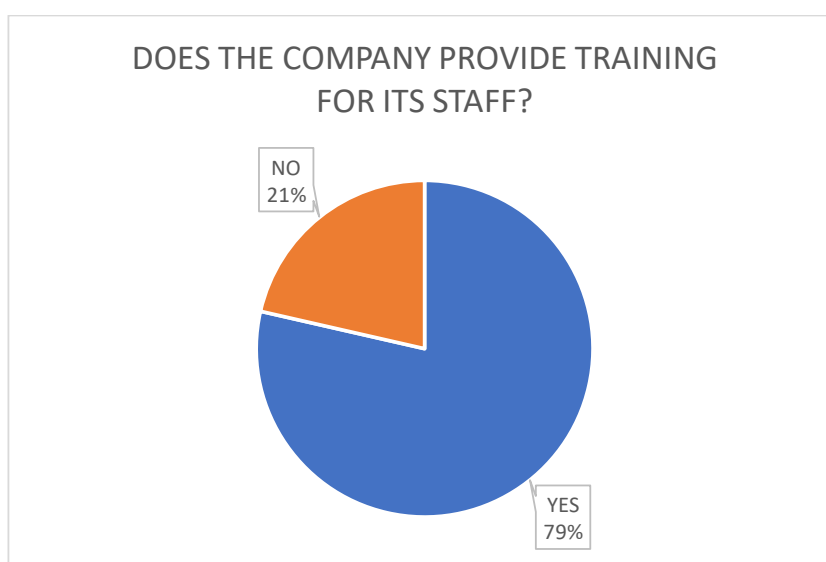

TECHLOG

3.2 Section 2: Training

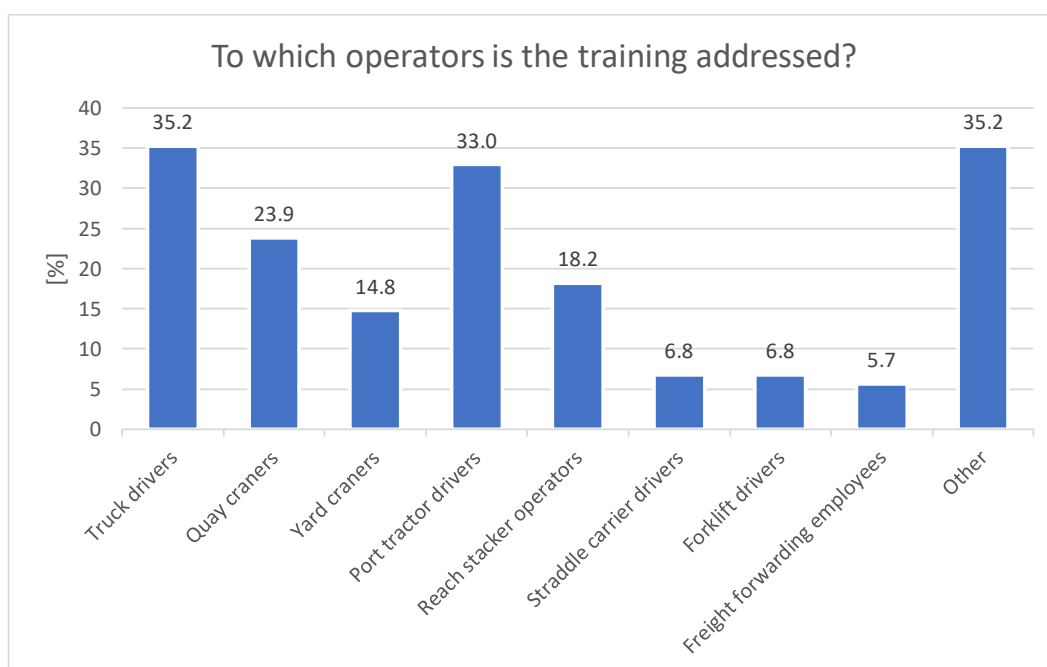

Of the 112 subjects analysed, almost 80% provide training for their staff, 55.7% of which explain that they are legally obliged to provide training for their staff. 52% also declare to provide non-compulsory training to their workers.

TECHLOG

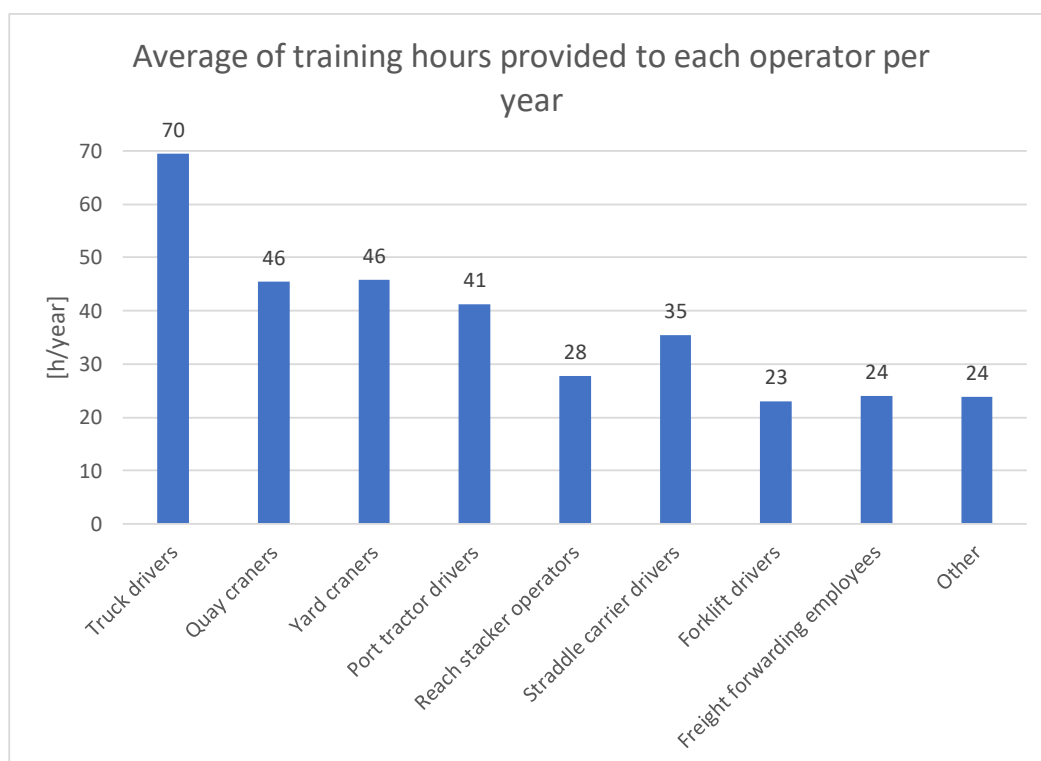

Among the respondents, training is mainly addressed to truck drivers (35,2%), port tractor drivers (33%), quay cranners (23,9%), and reach stacker operators (18,2%).

On average, it was found that the annual hours devoted to operator training amounted to approximately 37 per employee. More in detail, the average annual training hours for each category of operators is shown below.

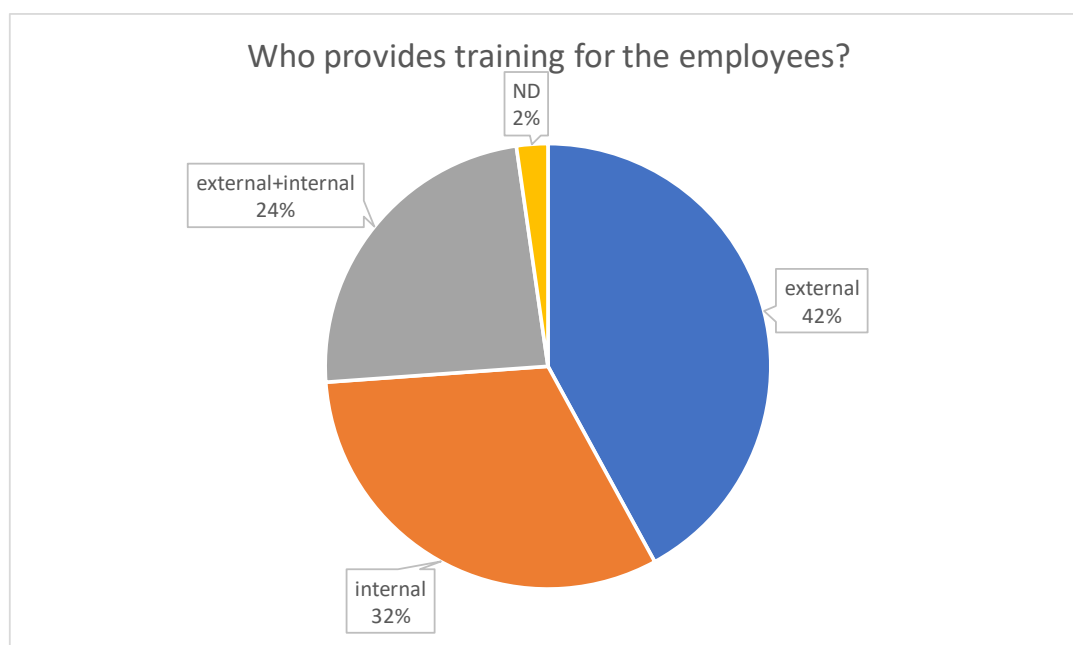

TECHLOG

Among the companies that declare to provide training for their staff, 42.0% use external training providers, 31.8% use internal training staff, 23.9% use a combination of both, 2.3% did not answer.

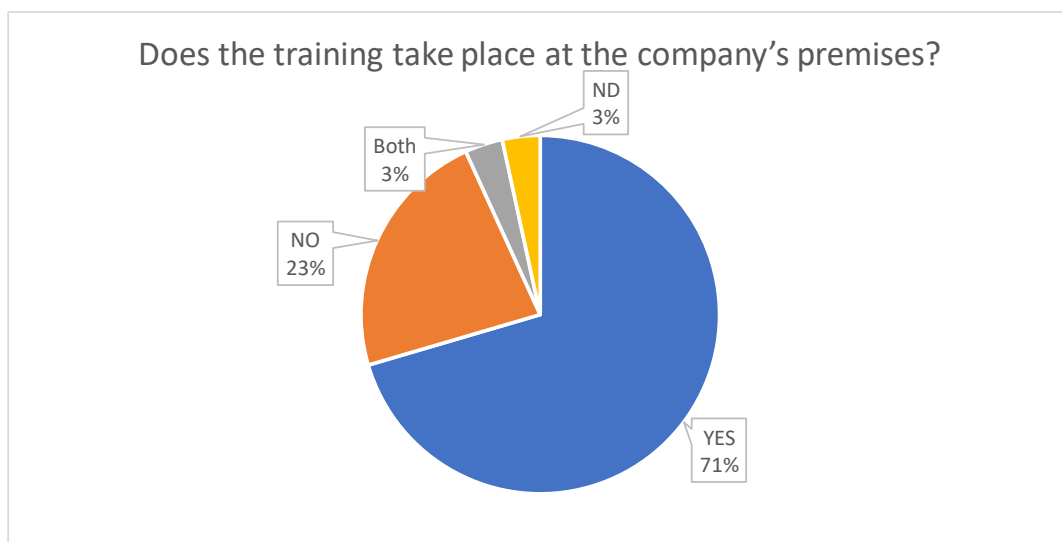

TECHLOG

70.5% of the companies that train their staff state that their training is carried out at company premises, 22.7% in external structures.

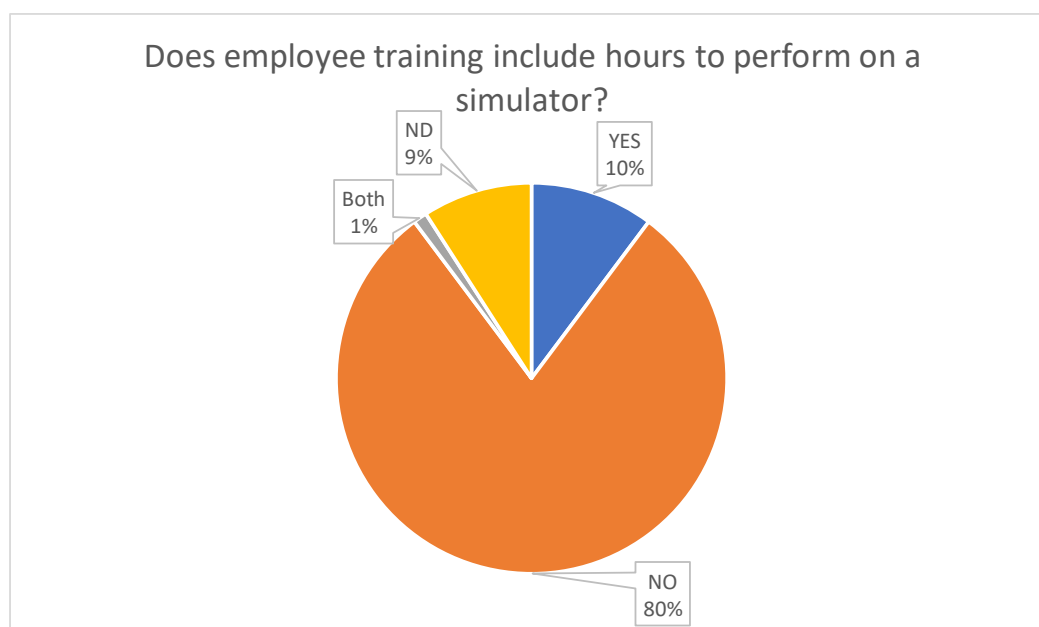

TECHLOG

Only 10.2% of the companies that train their staff declare to use driving simulators for training. 1.1% declare to perform training both with and without simulators, 9.1% do not answer this question.

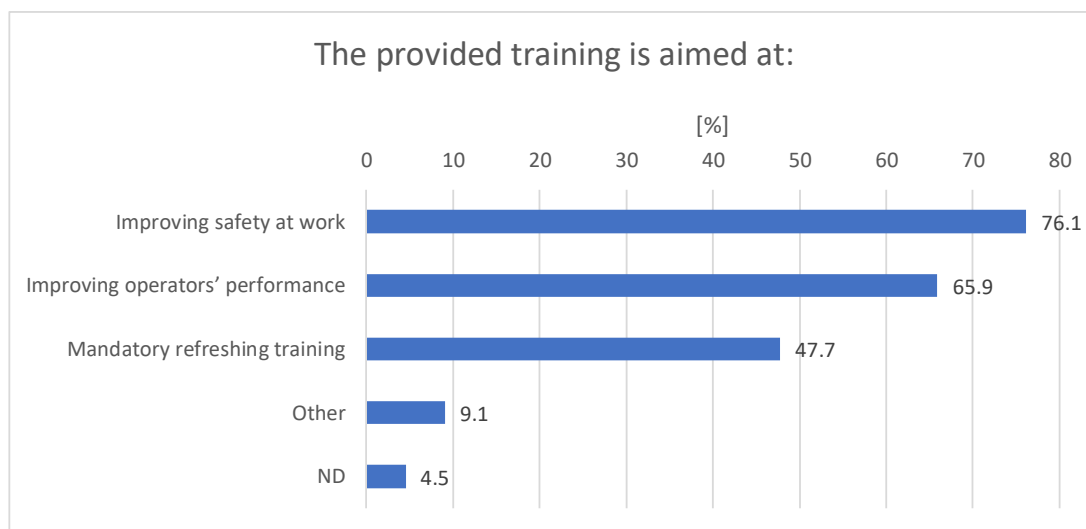

TECHLOG

Finally, the majority of companies that provide training to their staff state that the training provided to their employees is aimed at improving safety at work. A smaller but still high percentage (65.9%) state that they want to increase the productivity of their operators, while even smaller percentages, 47.7%, indicate that their objectives include compulsory refresher training and other purposes (9.1%). 4.5% of the companies do not answer to this question.

TECHLOG

3.3 Section 3: Activities carried out

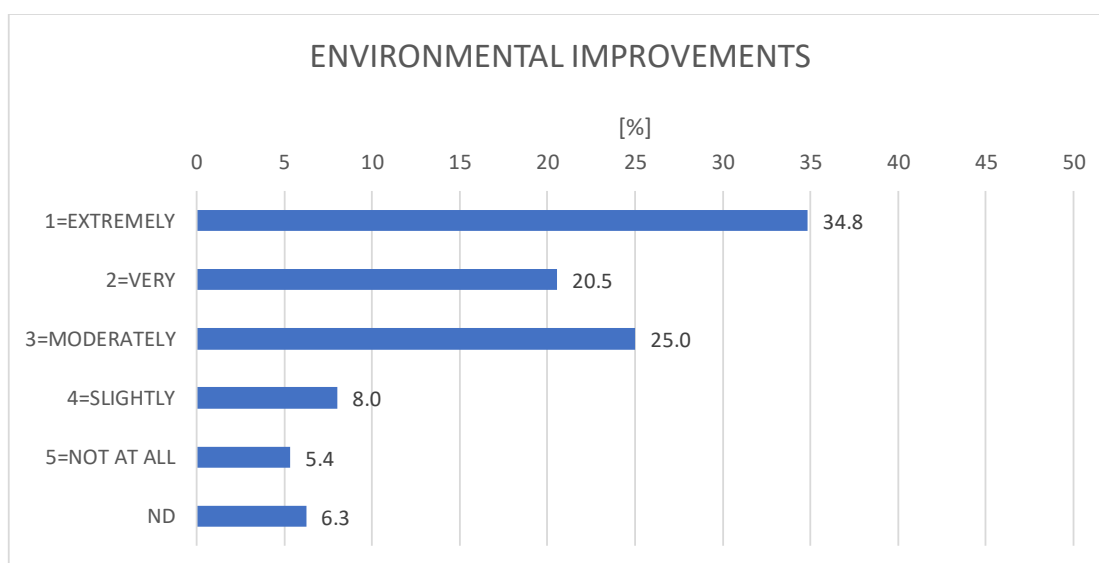

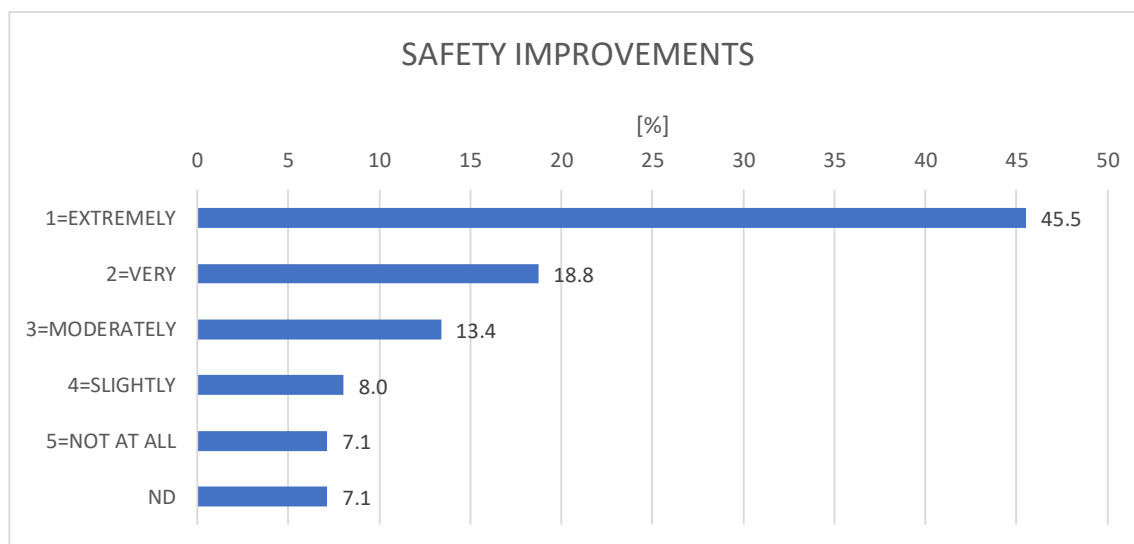

As can be seen from the graphs shown below, most of the companies surveyed feel the need to strengthen their business both from the point of view of safety, productivity and environmental sustainability. This is demonstrated by the fact that the average score assigned to each area of improvement is close to 2 = 'very', respectively 2.06 for safety, 2.24 for environment, and 2.10 for productivity.

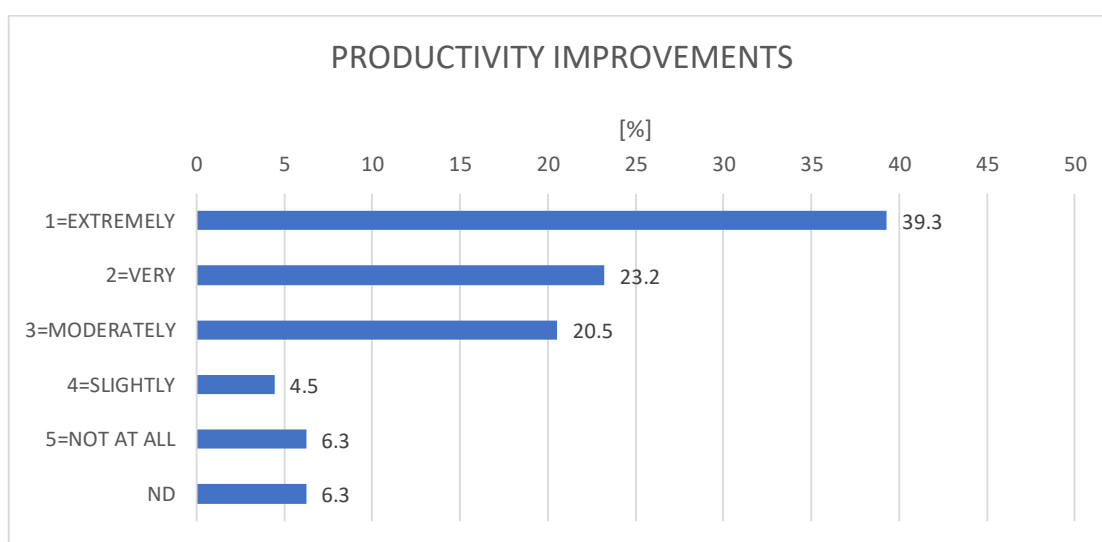

It can be noted that all three spheres play a leading role for the interviewees, but with a slight predominance of needs for safety and productivity improvements.

The individual areas for improvement are shown in the figure below:

TECHLOG

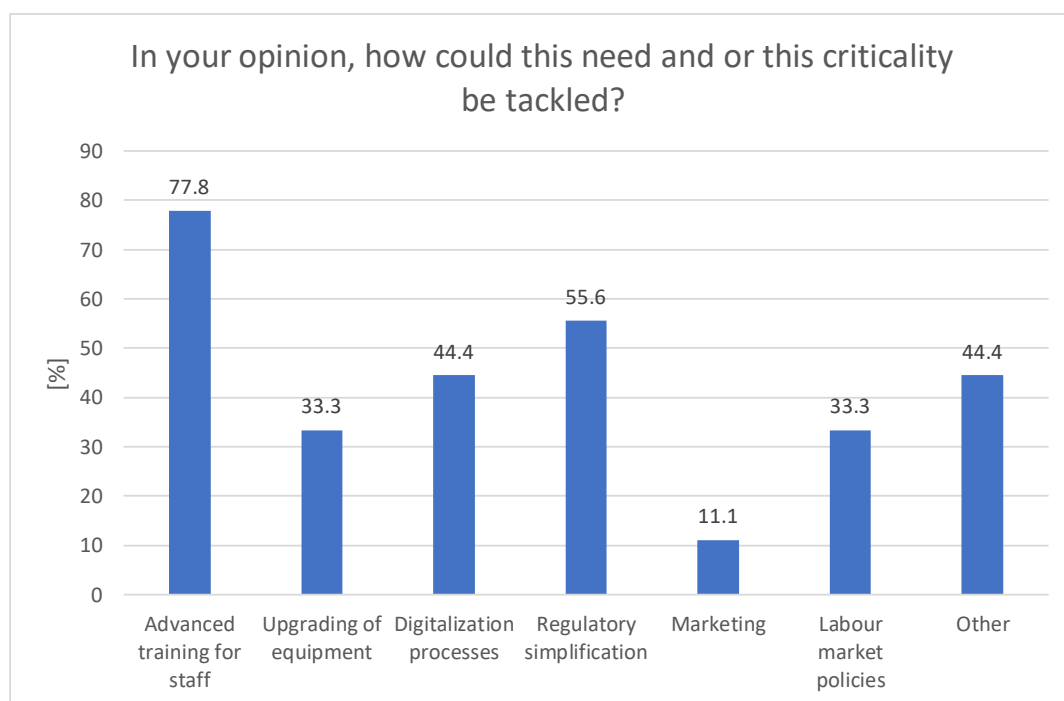

Only 8.0% of the subjects surveyed answer to the question regarding the main perceived needs and/or criticalities. The need for more staff training, also with the support of technology and in compliance with rules and regulations, is the most mentioned one. The high cost of labour is mentioned as one of the main criticalities. As for the potential solutions to face these needs and criticalities, the subjects surveyed mention: advanced training for staff (77.8%), regulatory simplification (55.6%), initiation of digitization processes (44.4%), upgrading of equipment (33.3%), new labour market policies (33.3%).

TECHLOG

3.4 Section 4: Projects

Only 12.5% of the companies declare their participation in other projects involving advanced training with or without the use of simulators. Below is the list of the projects mentioned:

- “S.UP.PORT - Skills enhancement in Ports”, European Commission - ESF-EQUAL, 2001/2006 - ISFOL Agency; main beneficiary, 2001-2005
- “VetPort: English for Port Handling drivers”, European Commission - ESF-ERASMUS PLUS, 2014/2020 - ISFOL Agency; main beneficiary, 2015-2017
- “Ports and skills: comparing vocational training systems to address changes in port work”, European Commission - ESF-ERASMUS PLUS, 2014/2020 - INAPP Agency; lead beneficiary, 2019, ongoing

TECHLOG

- “Training workers: food activities”, lead beneficiary (2016-2017)
- “Digital tachograph training”, partner (2017-2018)
- “Vetport project”, Erasmus Plus, associate partner (2016-2020),

1.1 Guidelines for implementation of activity A3.2	4
1.2 Partners' role	6
1.3 Deadlines for activity A3.1	7
2. Guidelines for the development of the activity A3.2	8
2.1 Guidelines for implementation of activity A3.2	8
2.2 Partners' role	9
2.3 Deadlines for activity A3.2	10

PREFATORY NOTE

This document intends to support the partnership in the correct implementation of WP3 “Analysis of the state of art and practice in the field of KETs for transport and port activities”.

The purpose of WP3 is twofold:

- to identify existing innovation practices, in the Euro-Med area, in the field of advanced simulation and training for port and transport activities, and analyze their potential implications on human factors, safety and environment
- to evaluate the transferability of the identified practices to a selection of Euro-Med transport and port operators who can benefit from such transfer to improve their performance in terms of productivity, safety and environmental impact.

To reach its goals, WP3 consists of 3 main activities:

- A3.1: Analysis of the state of art and practice in the field of advanced simulation and training for transport and port workers and identification of the leading organizations and research centers in the field
- A3.2: Identification of the Euro-Med transport and port operators/enterprises who can benefit from the transfer of the identified practices
- A3.3: Appraisal of the transferability of the identified practices to the selected subjects on the basis of their needs.

This document focuses only on activities A3.1 and A3.2 while activity A3.3, which will involve only the three academic partners (Unica-CIREM, ASSTMT, University of Sfax), will be analyzed in a second step.

In the following pages, the activities A3.1 and A3.2 will be specified in terms of objectives, targets, partner roles, time schedule for the completion of the task, and forms to be used for collecting information.

1. GUIDELINES FOR THE DEVELOPMENT OF THE ACTIVITY A3.1

Activity A3.1 aims to analyze the state of the art and practice in the field of advanced training via simulation, and the potential implications on safety, efficiency, and the environment.

IMPORTANT: It is worth highlighting that this activity allows you to start getting in touch with the network of stakeholders who will have to be involved in the subsequent phases of the project. In this regard, the survey to be carried out in the context of A3.1 should also be used as an opportunity to start getting in touch with the project target groups for their active involvement in the subsequent phases of the project.

1.1 GUIDELINES FOR IMPLEMENTATION OF ACTIVITY A3.2

▪ What are we interested in?

We are interested in taking a census (and collecting related information) of the organizations/operators in the Euro-Mediterranean area who carry out advanced training or research activities for port and transport personnel, particularly those that use driving simulators.

▪ Are we also interested in project experiences in the field of advanced training and simulation for port and transport personnel?

Yes, in this activity we also want to analyze both past and ongoing projects and initiatives dealing with advanced training and simulation for port and transport activities.

▪ What are the elements and subjects to survey?

The survey involves:

A) Subjects, organizations, operators involved in research, simulation and training activities for port and transport operators, specifically:

- **Universities**, and specifically those departments and schools that are involved in research activities (both basic or applied) and/or training activities for port and transport operators, also using driving simulators.
- **Research centers**, both public and private, that are involved in research activities and/or advanced training for port and transportation personnel, also using driving simulators.
- **Simulation centers**, both public and private, that are involved in research activities and/or advanced training for port and transportation personnel, also using driving simulators.
- **Training institutions** for ports and road transport activities.
- **Social security offices** dealing with training activities to improve the safety of port and transport workers.
- **Accredited certification bodies** for the issue of qualifications related to port work and road haulage licenses.

- **Specialized Institutes** that provide training, refreshing, and upgrading activities for road haulers and/or port staff.
- **Industries** that produce crane cabins and other port equipment
- **Companies** that sell and / or produce driving simulators for port and transportation personnel.
- **Companies** that manufacture crane cabins and other port equipment
- **Companies** producing cabins for trucks and heavy vehicles
- **Any other body/organization** involved in the provision of training activities for port and road haulage personnel.

B) Projects/initiatives (completed or ongoing) dealing with advanced training and simulation for port and road haulage personnel.

C) Websites/blogs/collaborative platforms resulting from a project or containing exchanges of data, experiences, guidelines on the topic of advanced training and simulation for port and road transport personnel.

▪ **How to develop the analysis?**

Our suggestion is to develop the survey according to the three main phases below:

- Step 1: preliminary identification of the subjects/initiatives of interest using on-desk research and in-house knowledge
- Step 2: using the provided forms, collection of the information available on the internet or in the related literature
- Step 3: direct interviews (email, face-to-face, virtual, telephone, etc.) to acquire any missing information necessary to complete the forms, and to establish direct contact with a representative of the entity surveyed

▪ **What are the information to collect?**

The collection of information must be carried out using the data collection forms developed by Unica- CIREM, coordinator of the activity:

- **Annex 1:** this form must be used to survey the subjects listed in point A that carry out activities in the field of advanced training and simulation for ports and transport activities.
IMPORTANT: it is preferable that the survey is of the accompanied type, the interviewer uses the form to collect the information of interest and proceeds to compile it.
- **Annex 2:** this form must be used to survey the projects/initiatives (both completed and ongoing) dealing with advanced training and simulation for ports and road haulage personnel.
- **Annex 3:** this form must be used to survey the websites/blogs (and similar) resulting from a project or containing exchanges of data, experiences, guidelines on the topic of advanced training and simulation for port and road transport personnel.

Note: to facilitate the survey work, all annexes are in editable pdf format.

1.2 PARTNERS'ROLE

The activity is coordinated by Unica – CIREM.

The partners involved and their role in the survey are detailed in the role matrix reported below:

A3.1 – ROLE MATRIX	APPL Unica	PP1 CCIAA MATI	PP2 AASTMT	PP3 EEIG	PP4 CEEBA	PP5 CCIA BML	PP6 Alex Chamber	PP7 CCI Sfax	PP8 Uni Sfax
<i>Census and data collection of organizations/operators who carry out advanced training or research activities using driving simulators for port and transport personnel</i>	For EU area		For Egypt, Morocco, Algeria	For Spanish area	For Libya, Lebanon	Support AAST/CEEBA in the analysis for the Lebanese area			For Tunisian area
<i>Census and data collection of projects/initiatives (completed or ongoing) dealing with advanced training and simulation for port and road haulage personnel</i>	For EU projects		For MENA projects (Egypt, Morocco, Algeria)	For Spanish projects	For MENA projects (Libya, Lebanon)	Support AAST/CEEBA in the analysis of the Lebanese projects			For Tunisian projects
<i>Census and data collection of web sites/web platforms resulting from a project or containing exchanges of data, experiences, guidelines on the topic of advanced training and simulation for port and road transport personnel.</i>	For EU		For Egypt, Morocco, Algeria	For Spain	For Libya, Lebanon	Support AAST/CEEBA in the analysis of the Lebanese initiatives			For Tunisia

1.3 DEADLINES FOR ACTIVITY A3.1

The following table shows the time schedule of activity A3.1, detailing the intermediate deadlines.

For the correct development of the project, **it is essential that all partners respect the indicated time plan.** We invite you to contact the WP3 coordinator (Unica-CIREM) immediately should any critical issues arise that could lead to an extension of the expected time.

TASK	DEADLINE
1. <i>Start of activities (according to the role matrix reported in paragraph 1.2)</i>	The day after receiving this inception report
2. <i>Sending to the WP3 coordinator (Unica-CIREM) the list of potential targets identified - Step 1 of activity A3.1</i>	By January 7 th , 2022
3. <i>Sending to the WP3 coordinator (Unica-CIREM) a progress status of the activity (n. of organizations/projects surveyed, type of data obtained so far, criticalities, etc.)</i>	By January 23 rd , 2022
4. <i>All partners receive feedback from the WP3 coordinator (Unica-CIREM) on the activity carried out until then</i>	By the end of January 2022
6. <i>All partners send to the WP3 coordinator (Unica-CIREM) a summary report of the activity and a copy of the data collection forms completed</i>	By mid-March 2022
7. <i>All partners receive feedback and any request for integration from the WP3 coordinator (Unica-CIREM)</i>	By the end of March 2022
8. <i>Partners send integrations and the last completed forms to the WP3 coordinator (Unica-CIREM)</i>	By April 15 th , 2022
9. <i>Drafting of the final report (O3.1) by the WP3 coordinator (Unica-CIREM)</i>	By the end of April, 2022

2. GUIDELINES FOR THE DEVELOPMENT OF THE ACTIVITY A3.2

Activity A3.2 aims to identify the Euro-Med transport and port operators who can benefit from advanced training and simulation to improve their performance in terms of productivity, safety, and environmental impact.

IMPORTANT: It is worth highlighting that this activity allows you to start getting in touch with the network of stakeholders who will have to be involved in the subsequent phases of the project. In this regard, the survey to be carried out in the context of A3.2 should also be used as an opportunity to start getting in touch with the project target groups for their active involvement in the subsequent phases of the project.

2.1 GUIDELINES FOR IMPLEMENTATION OF ACTIVITY A3.2

▪ What are we interested in?

We are interested in taking a census (and collecting related data) of the port and transport subjects/organizations, in the Euro-Mediterranean area, and their specific needs in the areas of innovation for growth, for safety, for the environment.

▪ Who are the subjects of our survey?

The subjects to be surveyed and analyzed are the following:

- **Trucking companies (haulers)**
- **Professional associations of haulers**
- **Port workers companies**
- **Professional associations of port workers**
- **Container Terminal Operators**
- **Port authorities**

▪ How to develop the analysis?

Our suggestion is to develop the survey according to the three main phases below:

- **Step 1:** preliminary identification of the subjects/initiatives of interest using on-desk research and in-house knowledge
- **Step 2:** using the provided forms, collection of the information available on the internet or in the related literature
- **Step 3:** direct interviews (email, face-to-face, virtual, telephone, etc.) to acquire any missing information necessary to complete the forms, and to establish direct contact with a representative of the organization surveyed

▪ **What are the information to collect?**

The collection of information must be carried out using the data collection form developed by the coordinator of the activity:

- **Annex 4:** this form must be used to survey the above listed subjects/organizations, which may be interested in technology transfer in the field of advanced training and simulation for ports and transport activities.

IMPORTANT: it is preferable that the survey is of the accompanied type, the interviewer uses the form to collect the information of interest and proceeds to compile it.

Note: to facilitate the survey work, the annex is in editable pdf format.

2.2 PARTNERS'ROLE

The activity is **coordinated by Unica – CIREM**.

The partners involved and their role in the survey are detailed in the role matrix reported below:

A3.2 – ROLE MATRIX	APPL Unica	PP1 CCIAA MATI	PP2 * AASTMT	PP3 EEIG	PP4 CEEBA	PP5 CCIA BML	PP6 * Alex Chamber	PP7 CCISfax	PP8 UniSfax
Census and data collection of subjects/organizations related to the <u>port sector</u>	Activity coordination	For Italian area	For Egyptian area*	For Spanish area		For Lebanese area	For Egyptian area*		For Tunisian area
Census and data collection of subjects / organizations related to the <u>road transport sector (road haulers)</u>	Activity coordination	For Italian area	For Egyptian area	For Spanish area		For Lebanese area		For Tunisian area	

***PP2 Arab Academy will need to coordinate with PP6 to carry out the survey, as they work on the same reference area**

2.3 DEADLINES FOR ACTIVITY A3.2

The following table shows the time schedule of activity A3.2, detailing the intermediate deadlines.

For the correct development of the project, **it is essential that all partners respect the indicated time plan.**

We invite you to contact the WP3 coordinator (Unica-CIREM) immediately should any critical issues arise that could lead to an extension of the expected time.

TASK	DEADLINE
1. <i>Start of activities (according to the role matrix reported in paragraph 2.2)</i>	The day after receiving this inception report
2. <i>Sending to the WP3 coordinator (Unica-CIREM) the list of potential targets identified - Step 1 of activity A3.2</i>	By January 7 th , 2022
3. <i>Sending to the WP3 coordinator (Unica-CIREM) a progress status of the activity (n. of subjects surveyed, type of data obtained so far, criticalities, etc.)</i>	By January 23 rd , 2022
4. <i>All partners receive feedback from the WP3 coordinator (Unica-CIREM) on the activity carried out until then</i>	By the end of January 2022
6. <i>All partners send to the WP3 coordinator (Unica-CIREM) a summary report of the activity and a copy of the data collection forms completed</i>	By mid-March 2022
7. <i>All partners receive feedback and any request for integration from the WP3 coordinator (Unica-CIREM)</i>	By the end of March 2022
8. <i>Partners send integrations and the last completed forms to the WP3 coordinator (Unica-CIREM)</i>	By April 15 th , 2022
9. <i>Drafting of the final report (O3.2) by the WP3 coordinator (Unica-CIREM)</i>	By the end of April, 2022

ANNEX 4: DATA COLLECTION FORM

THIS ANNEX MUST BE USED TO SURVEY PORT AND TRANSPORT SUBJECTS/ORGANIZATIONS AND THEIR SPECIFIC NEEDS IN THE AREAS OF INNOVATION FOR GROWTH, FOR SAFETY, FOR THE ENVIRONMENT.

SECTION 1: GENERAL INFORMATION

Name of the organization:

Address (street, city, country):

Website:

Reference person:

Name and surname:

Email:

Telephone:

REFERENCE SECTOR: ☐ Ports ☐ Road haulage ☐ Other

TYPE OF SUBJECT (Multiple options are selectable):

☐ Trucking company (haulers) ☐ Professional association of haulers

☐ Professional association of port workers ☐ Port workers' company

☐ Container Terminal Operator ☐ Port authority

☐ Other

COMPANY SIZE (Number of employees):

PROFESSIONAL DRIVER / OPERATORS IN THE COMPANY / ORGANIZATION, please indicate the number for each relevant category:

☐ truck drivers ☐ quay cranes ☐ yard cranes ☐ port tractor drivers

☐ reach stacker operators ☐ straddle carrier drivers ☐ Other

This document has been produced with the financial assistance of the European Union under the ENI CBC Mediterranean Sea Basin Programme. The contents of this document are the sole responsibility of TECHLOG Project and can under no circumstances be regarded as reflecting the position of the European Union or the Programme management structures.

SECTION 2: TRAINING

DOES THE COMPANY PROVIDE TRAINING FOR ITS STAFF?

☐ Yes ☐ No

If yes, please indicate the characteristics of the courses:

Is this company legally obliged to provide training for its employees? (If yes, please indicate the national or international legal reference)

☐ Yes ☐ No

Do employees also do non-compulsory training? (Only if you answered yes to the previous question)

☐ Yes ☐ No

To which operators is the training addressed?

☐ truck drivers ☐ yard cranes
☐ quay cranes ☐ straddle carrier drivers
☐ port tractor drivers
☐ reach stacker operators ☐ other

How many hours of training are provided each year to each operator? Complete for the relevant figures

☐ truck drivers ☐ yard cranes
☐ quay cranes ☐ straddle carrier drivers
☐ port tractor drivers ☐ reach stacker operators ☐ other

Who provides training for the employees?

☐ External training providers ☐ Internal training staff

Does the training take place at the company's premises?

☐ Yes ☐ No

☐ Yes ☐ No

(Please detail type of course, type of simulator, number of hours of use, etc.)

Does employee training include hours to perform on a simulator?

☐ Improving safety at work ☐ Improving operators' performance

The provided training is aimed at:

☐ Mandatory refreshing training ☐ Other

SECTION 3: IMPROVEMENTS AND IMPLEMENTATION

IN YOUR BUSINESS, WHICH OF THE FOLLOWING AREAS YOU WOULD YOU LIKE TO IMPLEMENT AND IMPROVE THROUGH ADVANCED TRAINING? *Indicate for each heading the most suitable value ranging from 1 (extremely) to 5 (not at all):*

	1	2	3	4	5
SAFETY IMPROVEMENTS:					
Improving system performance in terms of safety (e.g., improving the human-machine interface, reducing fatigue, reducing the likelihood of accidents, etc.).	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
ENVIRONMENTAL IMPROVEMENTS:					
Reducing the environmental impact of transport activities (e.g., eco-driving)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
PRODUCTIVITY IMPROVEMENTS:					
Improving the operator's performance in carrying out tasks.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

* 1: EXTREMELY; 2: VERY; 3: MODERATELY; 4: SLIGHTLY; 5: NOT AT ALL

SECTION 4: PROJECTS

Have this organization ever been involved in other projects related to advanced training activities with or without the use of driving simulators? ☐ Yes ☐ No

If YES, please provide information regarding the most relevant project(s):

PROJECT 1	
PROJECT NAME	<input type="text"/>
PROJECT FUNDED BY	<input type="text"/>
ROLE IN THE PROJECT	<input type="checkbox"/> Lead beneficiary <input type="checkbox"/> Partner <input type="checkbox"/> Associate Partner
IMPLEMENTATION PERIOD	From <input type="text"/> to <input type="text"/>
WEBSITE	<input type="text"/>

PROJECT 2	
PROJECT NAME	<input type="text"/>
PROJECT FUNDED BY	<input type="text"/>
ROLE IN THE PROJECT	<input type="checkbox"/> Lead beneficiary <input type="checkbox"/> Partner <input type="checkbox"/> Associate Partner
IMPLEMENTATION PERIOD	From <input type="text"/> to <input type="text"/>

SECTION 3: IMPROVEMENTS AND IMPLEMENTATION

IN YOUR BUSINESS, WHICH OF THE FOLLOWING AREAS YOU WOULD YOU LIKE TO IMPLEMENT AND IMPROVE THROUGH ADVANCED TRAINING? *Indicate for each heading the most suitable value ranging from 1 (extremely) to 5 (not at all):*

	1	2	3	4	5
SAFETY IMPROVEMENTS:					
Improving system performance in terms of safety (e.g., improving the human-machine interface, reducing fatigue, reducing the likelihood of accidents, etc.).	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
ENVIRONMENTAL IMPROVEMENTS:					
Reducing the environmental impact of transport activities (e.g., eco-driving)	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
PRODUCTIVITY IMPROVEMENTS:					
Improving the operator's performance in carrying out tasks.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

* 1: EXTREMELY; 2: VERY; 3: MODERATELY; 4: SLIGHTLY; 5: NOT AT ALL

SECTION 4: PROJECTS

Have this organization ever been involved in other projects related to advanced training activities with or without the use of driving simulators?

☐ Yes ☒ No

SECTION 1: GENERAL INFORMATION

Name of the organization:

Address (street, city, country):

Website:

REFERENCE SECTOR: ☐ Ports ☐ Road haulage ☒ Other

TYPE OF SUBJECT

- ☐ Trucking company (haulers) ☐ Professional association of haulers
☐ Professional association of port workers ☐ Port workers' company
☐ Container Terminal Operator ☐ Port authority
☒ Other

COMPANY SIZE (Number of employees):

PROFESSIONAL DRIVER / OPERATORS IN THE COMPANY / ORGANIZATION

- ☐ truck drivers ☐ quay cranes ☐ yard cranes ☐ port tractor drivers
☐ reach stacker operators ☐ straddle carrier drivers ☒ Other

SECTION 2: TRAINING

DOES THE COMPANY PROVIDE TRAINING FOR ITS STAFF? ☐ Yes ☐ No

If yes, please indicate the characteristics of the courses:

Is this company legally obliged to provide training for its employees? (If yes, please indicate the national or international legal reference)

☒ Yes

☐ No

Do employees also do non-compulsory training? (Only if you answered yes to the previous question)

☒ Yes

☐ No

To which operators is the training addressed?

- ☐ truck drivers ☐ yard cranes
☐ quay cranes ☐ straddle carrier drivers
☐ port tractor drivers
☐ reach stacker operators ☒ other

How many hours of training are provided each year to each operator? Complete for the relevant figures	<input type="checkbox"/> truck drivers	<input type="checkbox"/> yard cranes	
	<input type="checkbox"/> quay cranes	<input type="checkbox"/> straddle carrier drivers	
	<input type="checkbox"/> port tractor drivers		
	<input type="checkbox"/> reach stacker operators	<input checked="" type="checkbox"/> other

SECTION 4: PROJECTS

Have this organization ever been involved in other projects related to advanced training activities with or without the use of driving simulators?

☐ Yes ☒ No

SECTION 1: GENERAL INFORMATION

Name of the organization:

Address (street, city, country):

Website:

REFERENCE SECTOR: ☐ Ports ☐ Road haulage ☒ Other

TYPE OF SUBJECT

- ☐ Trucking company (haulers) ☐ Professional association of haulers
- ☐ Professional association of port workers ☐ Port workers' company
- ☐ Container Terminal Operator ☐ Port authority
- ☒ Other

COMPANY SIZE (Number of employees):

PROFESSIONAL DRIVER / OPERATORS IN THE COMPANY / ORGANIZATION

- ☐ truck drivers ☐ quay cranes ☐ yard cranes ☐ port tractor drivers
- ☐ reach stacker operators ☐ straddle carrier drivers ☒ Other

SECTION 2: TRAINING

DOES THE COMPANY PROVIDE TRAINING FOR ITS STAFF? ☐ Yes ☐ No

If yes, please indicate the characteristics of the courses:

Is this company legally obliged to provide training for its employees? (If yes, please indicate the national or international legal reference)

☒ Yes

Transport of dangerous goods, defensive driving

☐ No

Do employees also do non-compulsory training? (Only if you answered yes to the previous question)

☒ Yes

☐ No

To which operators is the training addressed?

- ☐ truck drivers ☐ yard cranes
- ☐ quay cranes ☐ straddle carrier drivers
- ☐ port tractor drivers
- ☐ reach stacker operators ☒ other

How many hours of training are provided each year to each operator? Complete for the relevant figures	<input type="checkbox"/> truck drivers	<input type="text"/>	<input type="checkbox"/> yard cranes	<input type="text"/>
	<input type="checkbox"/> quay cranes	<input type="text"/>	<input type="checkbox"/> straddle carrier drivers	<input type="text"/>
	<input type="checkbox"/> port tractor drivers	60		
	<input type="checkbox"/> reach stacker operators	<input type="text"/>	<input checked="" type="checkbox"/> other	<input type="text"/>
Who provides training for the employees?				
	<input checked="" type="checkbox"/> External training providers		<input checked="" type="checkbox"/> Internal training staff	
Does the training take place at the company's premises?				
	<input checked="" type="checkbox"/> Yes		<input type="checkbox"/> No	
Does employee training include hours to perform on a simulator?				
	<input type="checkbox"/> Yes		<input checked="" type="checkbox"/> No	
(Please detail type of course, type of simulator, number of hours of use, etc.)				
<div style="border: 1px solid black; height: 100px; width: 100%;"></div>				
The provided training is aimed at:				
	<input checked="" type="checkbox"/> Improving safety at work		<input checked="" type="checkbox"/> Improving operators' performance	
	<input checked="" type="checkbox"/> Mandatory refreshing training		<input type="checkbox"/> Other	<input type="text"/>

SECTION 3: IMPROVEMENTS AND IMPLEMENTATION
